

CERAMANY

Ceramics and More

High-performance ceramics
rapid – flexible – cost-effective

RAPID – FLEXIBLE – COST-EFFECTIVE

High-performance ceramics produced in-house

CERAMANY GmbH is your partner when it comes to the production of state-of-the-art high-performance ceramics and composite materials. We specialise in complex ceramic components with large-volume production.

We are masters in the production of various types of high-performance ceramics using injection moulding technology, pressing technology and precision grinding, including assembly of components.

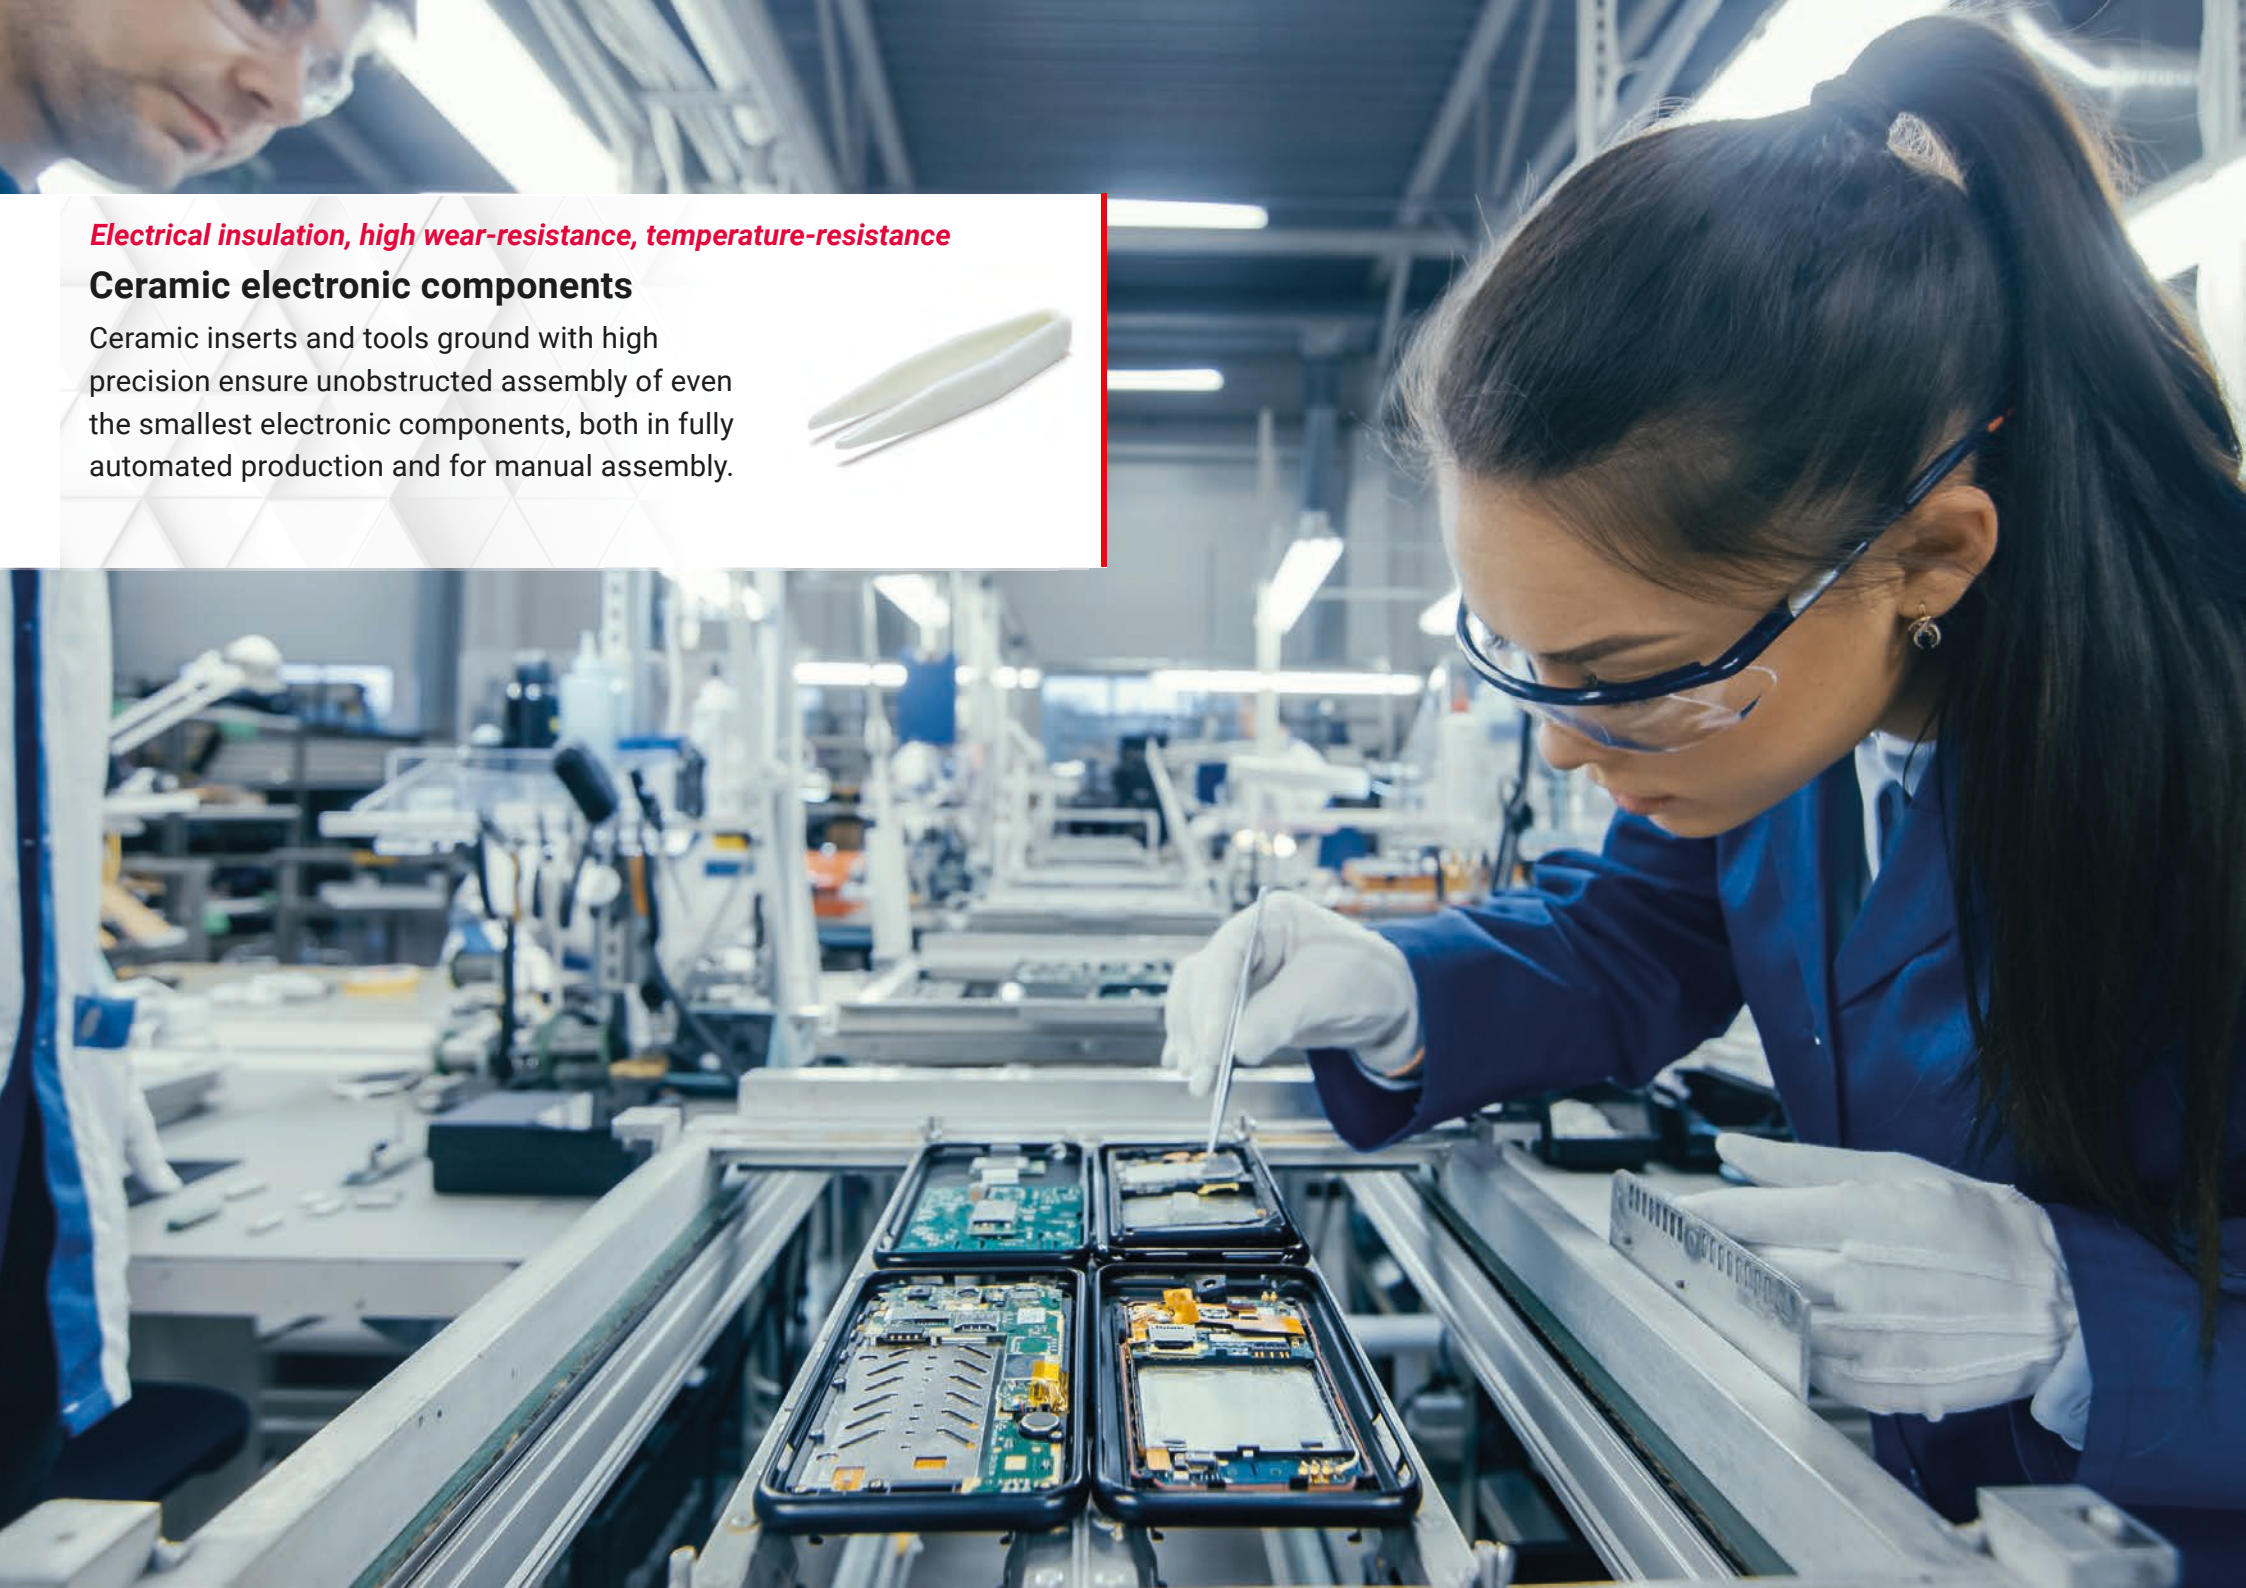

Thanks to in-house mould-making, you can switch from metal and plastic components to long-lasting ceramic rapidly and cost-effectively with us.

We secure your stable supply chain through customer-specific warehousing.

Electrical insulation, high wear-resistance, temperature-resistance

Ceramic electronic components

Ceramic inserts and tools ground with high precision ensure unobstructed assembly of even the smallest electronic components, both in fully automated production and for manual assembly.

Excellent non-stick properties

Robotic welding nozzles

Pearling of the welding spatter ensures safe processes of the highest quality.

Rigid, high-precision

Ceramic shaft extensions

Fault-free use in high-precision measuring machines because there is no plastic deformation of the sensor unit

Thermally and chemically resistant, wear-resistant

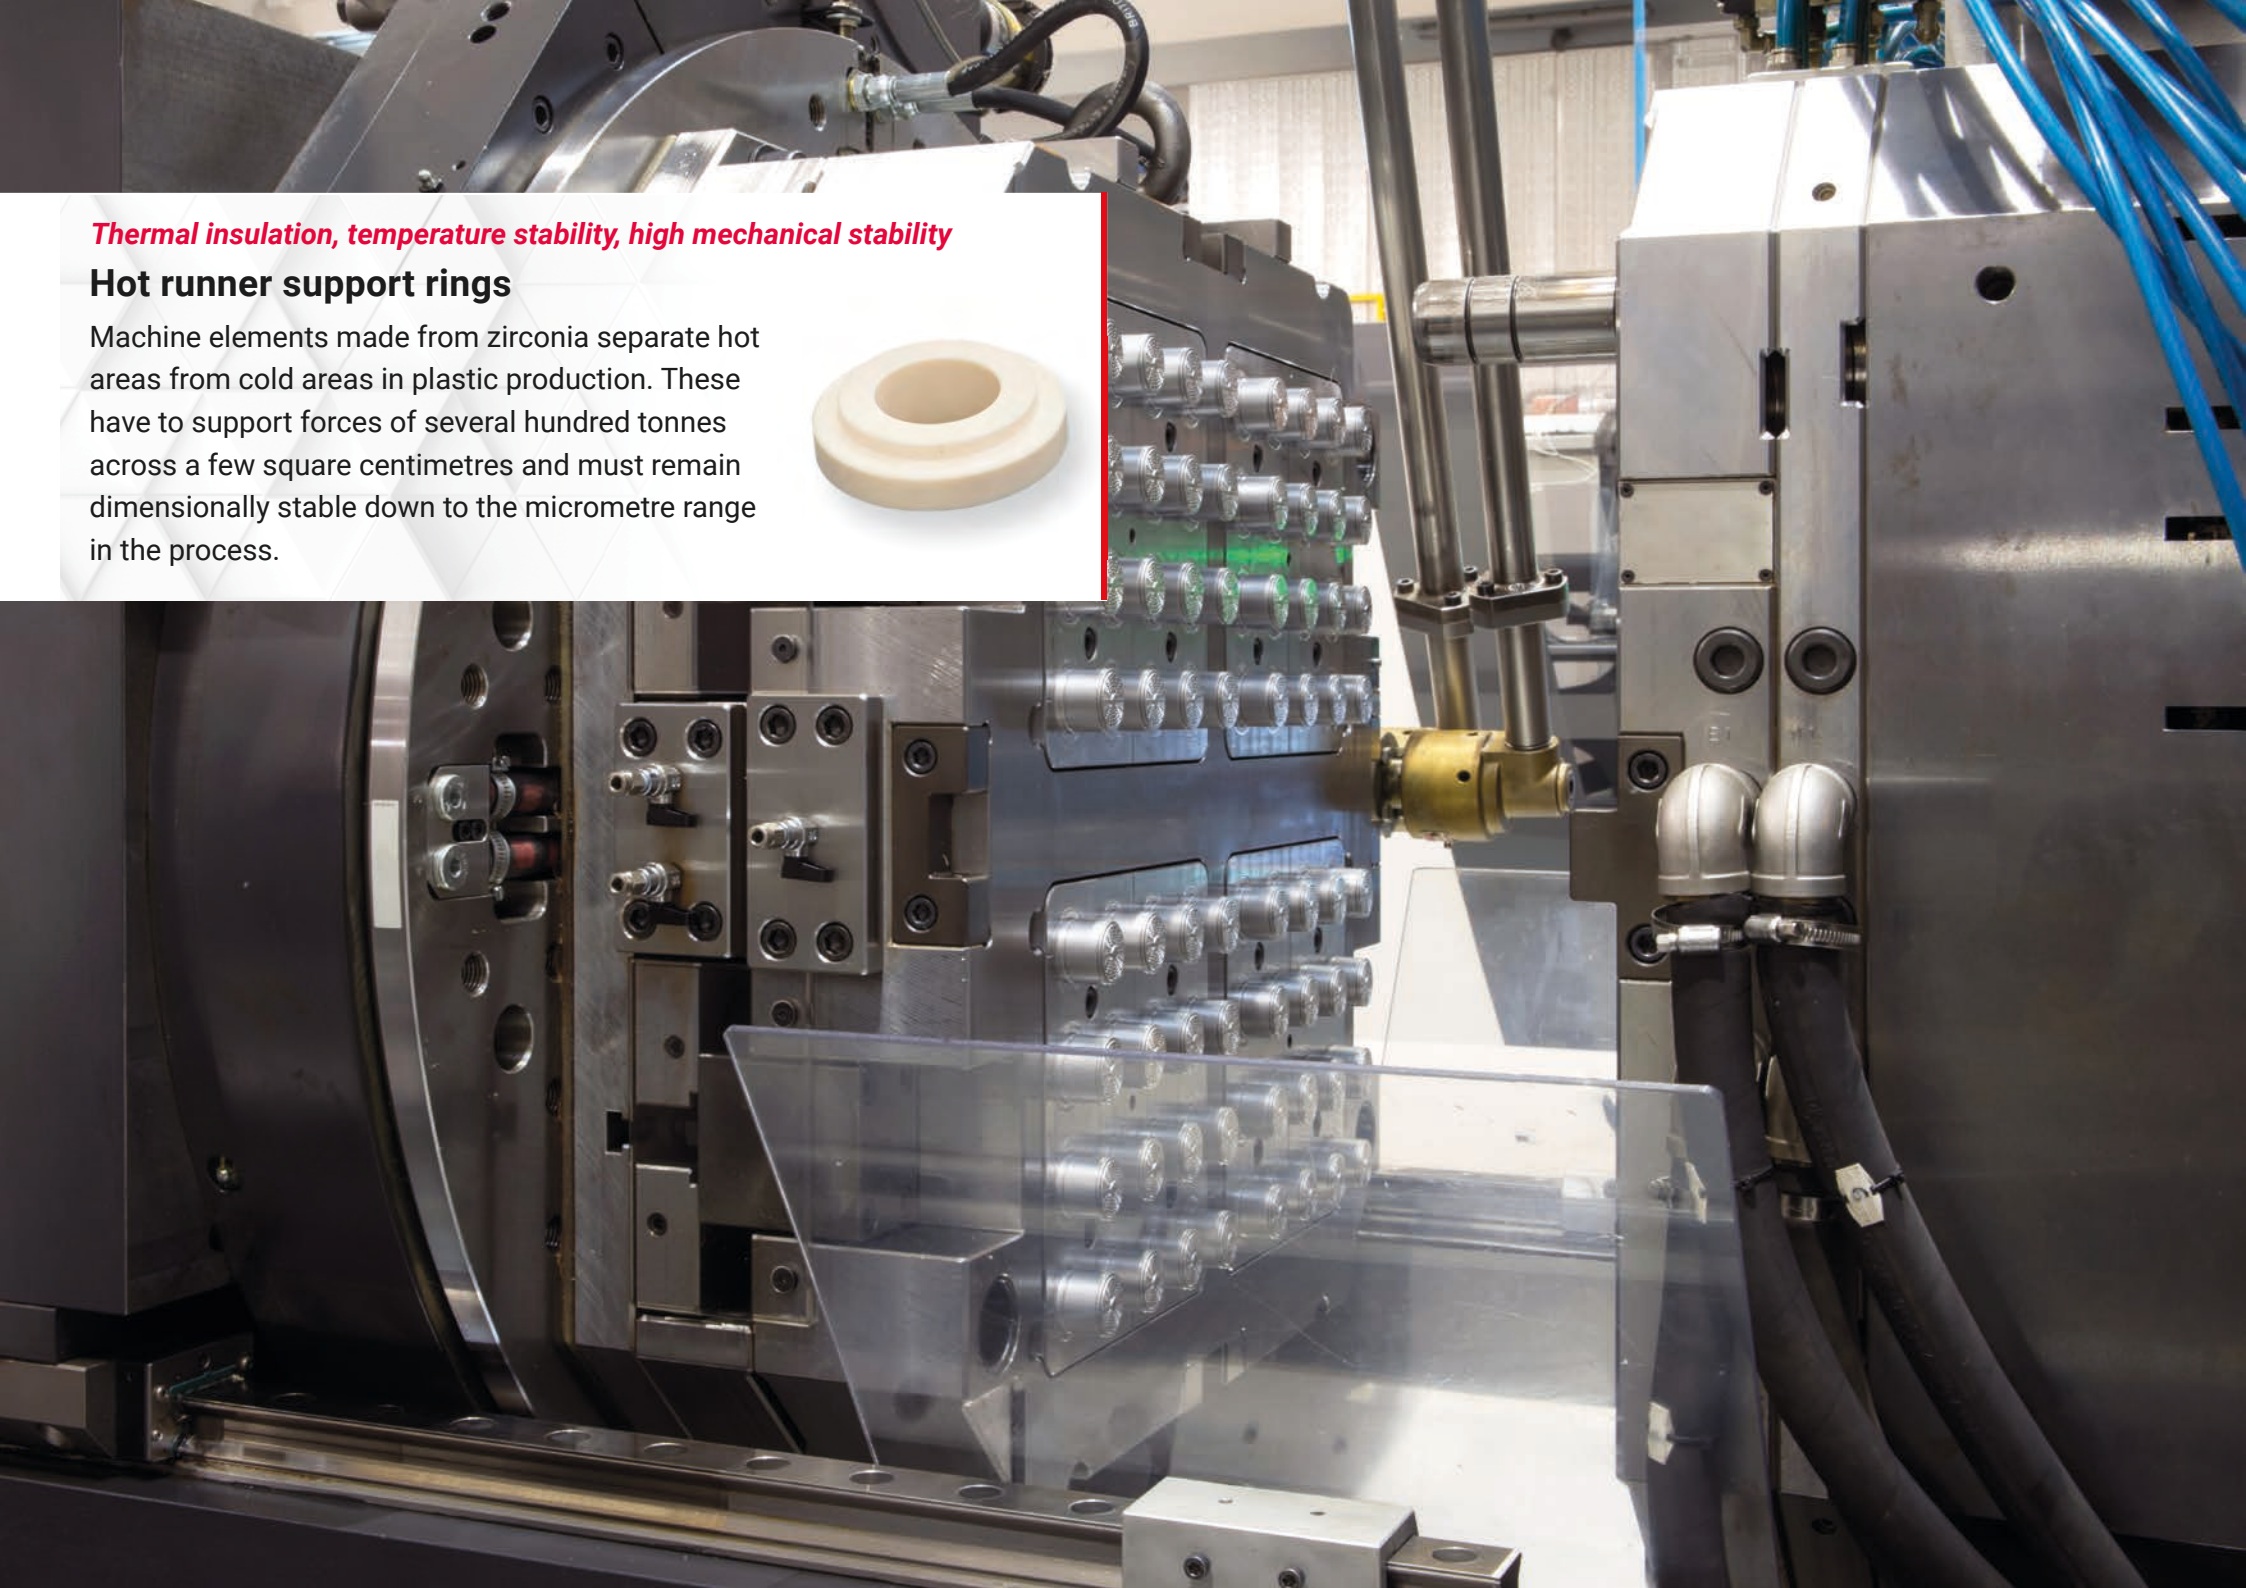

Lighting mass production

Fail-safe production aids made from ceramic and composite materials prevent machinery breakdowns in your series production.

Thermal insulation, temperature stability, high mechanical stability

Hot runner support rings

Machine elements made from zirconia separate hot areas from cold areas in plastic production. These have to support forces of several hundred tonnes across a few square centimetres and must remain dimensionally stable down to the micrometre range in the process.

Electrically insulating, abrasion-resistant

Locating pins

The ceramic in the locating pin provides electrical insulation and, thanks to its high wear resistance, ensures stable and exact positioning.

CUSTOM CERAMICS FOR A WIDE VARIETY OF AREAS OF APPLICATION

From standard parts through to complex drawing parts

We are:

- Founded in 1995
- 120 employees
- ISO 9001:2015 certified
- Innovative with in-house R&D
- Modern and sustainable in our energy consumption
- Solidly financed
- ...still your reliable partner tomorrow...!

We stand for:

- Excellent price-performance ratio
- In-house design and mould-making
- Hybrid solutions, as well as production of complete assemblies
- Modern machine park
- Assured quality (in-house measurement laboratory)
- ...delivery times which will impress you...!
